TERMS AND CONDITIONS OF SALE

PRICES

This pricelist replaces all previous ones and it is valid from 01/02/2023. VAT not included.

ORDERS

Orders must include complete address and information for both billing and shipping. Acceptance of an order is evidenced by the issuance of a Crassevig Order Confirmation which constitutes the agreement between the purchaser and Crassevig. Purchasing is subject to the terms and conditions set forth therein. The purchaser is responsible for checking Order Confirmation to insure against any discrepancy. Changes and errors must be noted in writing to Crassevig within 3 working days. Orders will not be entered into production until Crassevig has received all the necessary information, the deposit, and COM/COL, if required. Quoted ship date refers to the date an order is estimated to be ready for delivery from our factory and do not include delivery time to final destination. All quoted delivery dates are best estimates and are subject to delay or failure of delivery due to any cause beyond our control. Neither penalties nor responsibilities will be accepted for delays in deliveries. Special freight requests will be charged separately.

CANCELLATIONS

Cancellations must be approved in writing. No cancellations will be accepted once production has been started. Penalties will apply.

SHIPMENTS

Shipments are regulated by international transport norms INCOTERMS 2010. If not specifically agreed, standard terms are EXW Ex Works.

In case of DAP terms, shipping instructions must be sent together with the order. Crassevig has the right to select the carrier and itinerary. Transport means warehouse and does not provide installation costs or delivery. Any special requests will be billed separately.

FREIGHT CLAIMS

Crassevig furniture is carefully inspected and securely packed prior to shipment.

For shipments with DAP terms, customer must examine all merchandise before accepting delivery from carrier. If there is any visible damage to the carton, a notation of such must be made on the delivery note before the shipment is accepted. All claims for damage, shortage or loss must be filed with the carrier within 7 days of delivery and all packing materials must be retained until inspection is made. Claims for concealed damage must be filed with the carrier within 7 days of delivery. In all cases, damage claims will not be accepted after a period of 7 working days following delivery.

All claims should be documented with photos if possible in order to facilitate the handling of the claim. Claims will not be accepted for goods sold with EXW terms.

PACKING

Standard packing in cartons is included in the price. Any special packing requirements will be listed separately on the Order Confirmation. For air freight shipments, additional cartoning or crating is always required. Contact Customer Service for pricing on special packagings.

RETURNS

No returned goods will be accepted unless customer has received written permission from Crassevig. All returned goods must be shipped freight prepaid DAP.

PRODUCT CONFORMITY

Crassevig products are manufactured in accordance with ISO 9001 Standards and EU requirements. Any different requirement should be requested and confirmed in written, and in any case prior to order.

WARRANTY

Without prejudice to the legal warranties provided under national law, Crassevig warrants that the products delivered for this specific project are free from defects in materials or workmanship for a period of TWO (2) years as of date of delivery (with the exceptions and exclusions specified below).

Crassevig will repair or replace with comparable product, at its option and free of charge (for material and components), at ex works terms (EXW Incoterms 2010) any product, part or component which fails under normal use.

It does not apply to product failure resulting from: normal wear and tear; failure to apply, install, or maintain products according to Crassevig instructions and guidelines; abuse, misuse, or accident, or repeated knocks; damage, marking, or staining of

veneer surfaces due to contact with rubber or similar compounds; damage from sharp objects or imprinting from writing instruments, or prolonged exposure to direct sunlight; foreign objects abrading fabric over time; alteration or modification of the product; use in more than a single shift per day; in which case, the warranty is reduced accordingly.

The following products and materials are not covered by this warranty: Products considered consumables (e.g. gliders, gas springs, wheels); Upholsteries (please refer to supplier warranty); Pilling of textiles; Matching of colours, grains, or textures of natural materials; Variations occurring in surface materials (e.g. colourfastness, sheen on veneer surfaces or matching grains, textures and colours across dissimilar substrates and lots).

Crassevig reserves the right to request that the damaged product be returned before replacement.

This limited warranty shall be the only remedy against the manufacturer in the event of any product defect, to the exclusion of any warranty granted additionally by the distributor. The liability of Crassevig shall be strictly limited to the aforementioned obligations and it is expressly provided that Crassevig shall not be liable for consequential or incidental damages or operating losses.

FINISHES

Standard finishes for each product are detailed on the price list. Factory samples are not intended as exact match to actual production. Crassevig is not responsible for variations in finish colours due to natural variations in materials and sunlight. Wood is a natural material, with properties and characteristics which can vary within the same species according to the place of growth. Besides, in a trunk there are different colours and veining. In the outside part, wood is lighter with open veining and darker with straighter vein in the centre. For this reason, it is not possible to guarantee exact uniformity of colour and veining in case of completing orders or matching different products.

DESCRIPTIONS

Crassevig reserves the right to make changes in price, dimensions, design, constructions and/or materials used, without prior notice. All weights and measurements are approximate.

COM

COM requirements for 130, 140 and 150 cm wide fabrics of solid colour are shown in the product pages of the price list. Please contact our office for requirements for fabrics with a different width. All COM orders must be accompanied by written cutting instructions. Fabric patterns should be identified as requiring vertical or horizontal application to a frame and which side is "face-up".

Two cuttings of COM fabric must be attached to the purchase order to avoid any possible errors in upholstery. Packages should be clearly tagged with the client's Order Number and the items to be upholstered. Price for fabric testing is not included and will be charged separately.

If materials are shipped from non-European Union countries, please be sure to include an invoice with no commercial value for customs clearance purposes. Any additional expenses incurred by Crassevig in using C.O.M. will be charged in the final invoice.

PAYMENT DETAILS

Payments must only be transmitted to our offices. Failure or delay to pay even part of one invoice or deadline shall authorise Crassevig to suspend execution of the supply or to cancel contracts with the right to compensation for occurred damages. 50% deposit is required upon placement of order, balance due before delivery, if not agreed differently. All orders containing custom specifications require 50% deposit without exception. Production of orders will start at receipt of deposit.

Furthermore, delays of payment entail a charge of interests, in compliance with EC Directives. Goods will remain the property of Crassevig until the invoice has been paid in full.

ACCEPTANCE

All these conditions are assumed as accepted at the receipt of the order.

DISPUTES

All possible disputes will be within the cognizance of the Court of Udine, Italy.

CERTIFICATIONS

ISO 9001:2015 / ISO 14001:2015

The first is the standard that provides a set of standardized requirements for a quality management system aimed to enhance customer satisfaction through the effective application of the system itself, including processes for continual improvement and the assurance of conformity to customer and applicable statutory and regulatory requirements. The latter specifies requirements for an environmental management system to enable an organization to develop and implement a policy and objectives which take into account legal requirements and other requirements to which the organization subscribes, and information about significant environmental aspects.

MANUFACTURED IN ITALY

The whole Crashevig production is exclusively made in Italy, primarily with "zero-mile" principles and according to criteria of quality, safety, attention to detail, selection of materials, respect for people and workplace, and environmental protection.

FSC® CERTIFICATION

We design and manufacture our wooden products respecting life and environment and responsibly preserving wood as an important resource. To achieve this objective, we have just obtained the FSC® Certification to guarantee that the wood used for our products comes from responsibly managed forests. A value for the companies that produce, for those who buy and those who use our products.

Certificate Code: DNV-COC-001372 FSC

License Code: FSC-C110857

PRODUCT CERTIFICATIONS

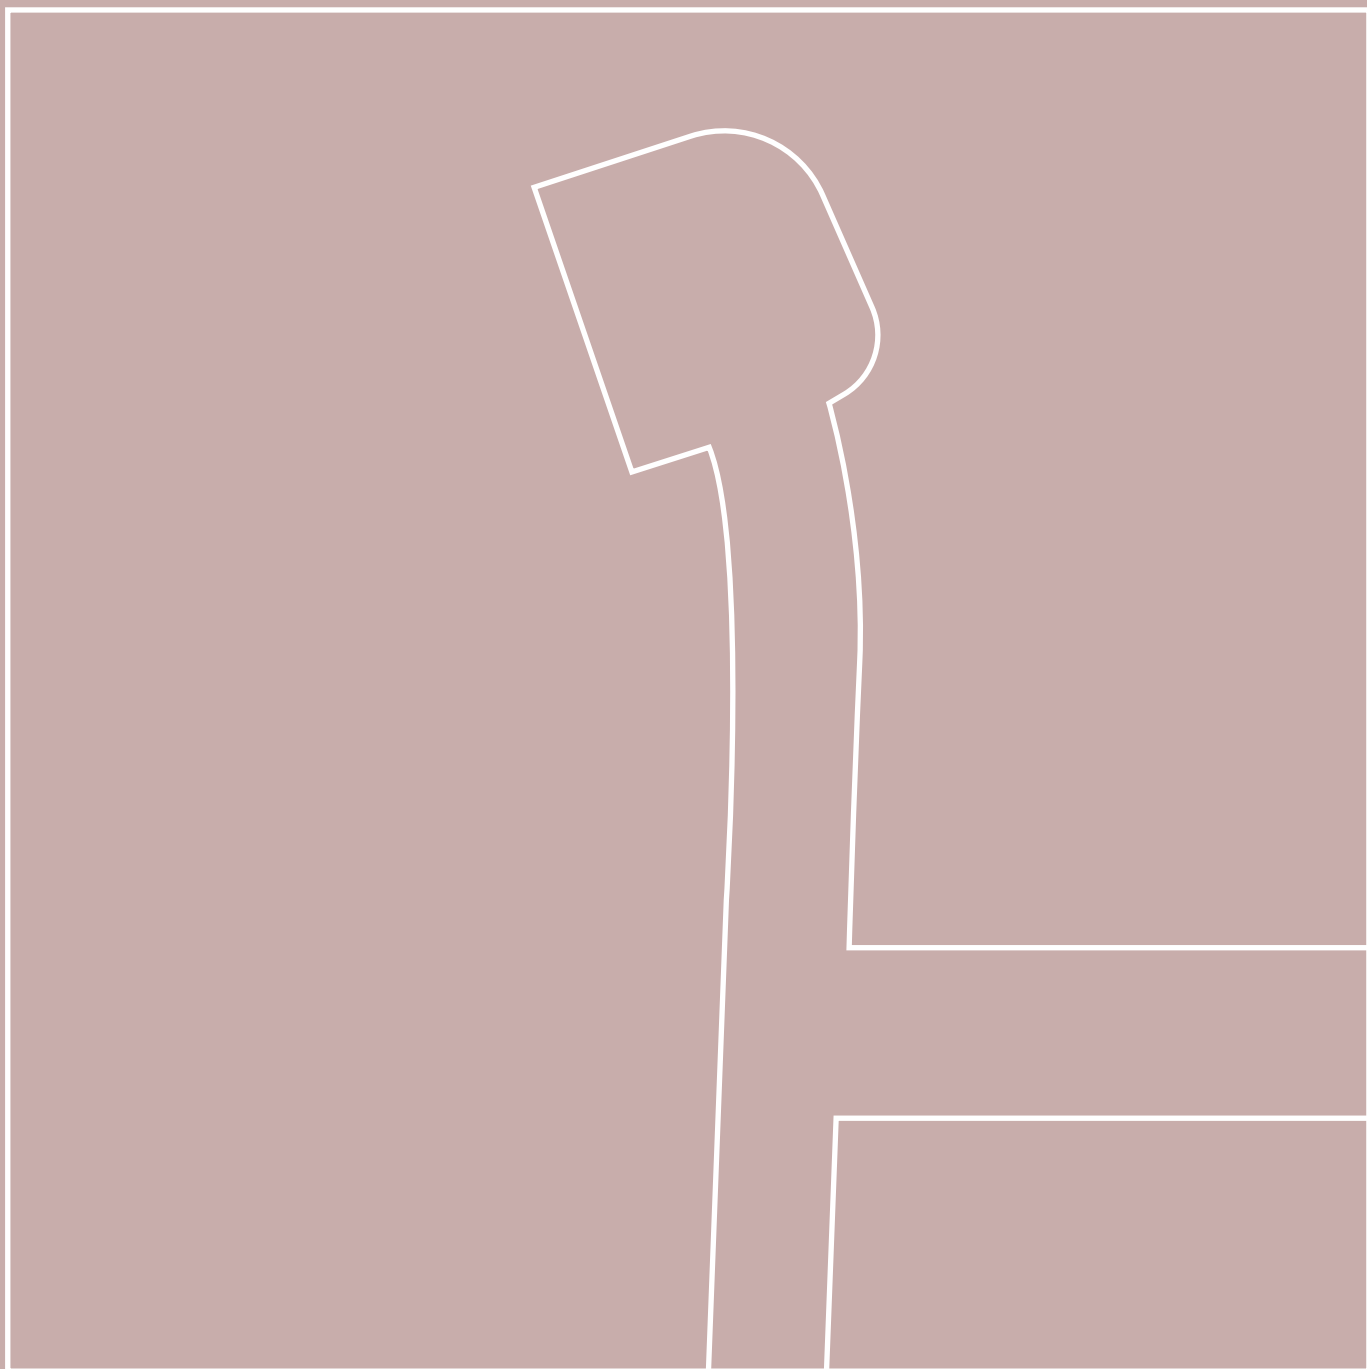

We collaborate since many years with CATAS, the most important Italian research institute and test laboratory in the wood and furniture field. We perform strict testing on our products in accordance with European and international standards, to ensure durability even in the most heavy contract use.
