LJ 3 is a universal bar-height stool for commercial interiors. Made from sustainable PET Felt and high-strength steel, this piece of furniture is durable and recyclable after long-time use. Suitable for informal settings in the offices, public spaces, bars and restaurants. LJ 3 is available in eleven unique PET Felt blends. The design of the stool can be further customised with bespoke frame colour and optional seat upholstery.

Designed by **Laurens van Wieringen**

### Product overview

### Sustainability goals at De Vorm

We strive to do more with less when creating a comfortable living and working environment. To fulfil this purpose, we are constantly looking for sustainable materials, local suppliers and partners sharing the same values. Ensuring that our products are recycled, durable and recyclable after a long lifespan.

#### PET Felt technology

PET Felt is made from recycled PET bottles. Cut into smaller flakes, plastic is turned into thin fibres that are intertwined together to form a layer of felt. Further, it is pressed into the shape of a final product with the heat. As a result, PET Felt material is soft to touch and sturdy enough to be used for chair shells and room dividers. PET Felt is UV-stabilised and offers sound-dampening properties due to its open-cellular structure.
