san_siro

KUSCH+CO
by Nowy Styl

A name with prestige – named after the moniker of the Giuseppe Meazza stadium in Milan, which was the inspiration for one of the novel table top shapes. This extremely versatile table series opens up an almost infinite number of design and finishing options for tables and table configurations in all sizes and shapes. Either stationary on glides or mobile on castors. Its signature feature is the slender tubular steel column frame supported by flat, straight aluminium pedestals.

Design by Norbert Geelen

After having completed his training as industrial designer at the University of Essen, he started freelancing at the Italian Studio Mattheo Thun in Milan. Together with his partner Robert Kilders, he founded the design studio bert&bert in 1997. Since 2005, Norbert Geelen feels at home both in his German office in Straelen and in his Milan studio. He has specialised in designing upmarket lifestyle products and furniture.

Variations

6000/6035 Table with T pedestals

Next to the stadium shape, which lends its name to san_siro, this table series comprises rectangular as well as barrel table tops. Dependent on the table top size, either with small or large T pedestals. The largest rectangular table tops are supported by double column pedestals.

6000 Table with cross pedestals

The central cross pedestal of this compact-sized table is as elegant as it is stable, and can be combined with round, square and pebble shaped table tops. The large-sized round and square table tops are supported by a four-column cross pedestal.

6020 Bar table

The bar table features a cross frame as well as a higher column, ideally suited for receptions. Next to the square and round table tops, the bar tables are available with the pebble shaped table tops, characterised by an appealing asymmetry.

6040 Folding table, horizontally stackable

When equipped with castors, the san_siro folding tables become mobile. They are designed for multifunctional uses in offices, training classrooms, and meeting and conference rooms. The variations featuring a rectangular table top are available in an array of sizes and with many different power and data options.

Variations

6050/6055 Folding table, horizontally stackable

These tables can be nested together for space-saving storage. If the rectangular table top is swivelled into a vertical position, the pedestals automatically turn inwards by about 30° for optimum nesting. With a small overhang on the short sides, the table offers maximum space on the long sides. With the large overhang, it is possible to sit at the head of the table with plenty of legroom.

6085 Folding table, horizontally stackable

Featuring a barrel table top available in four different sizes. The protruding table top on the sides offers plenty of legroom. When the table tops are vertically flipped down, the pedestals turn inwards for compact stacking. All table top sizes come with the large T-shaped pedestals.

Handling

- Manually operated with one hand
- Mechanism automatically locks into place when the table top is in a horizontal position
- The horizontal table top is securely locked into place, no accidental flipping back
- Flat release mechanism
- Wear- and maintenance-free mechanism
- Folding and nesting with mounted modesty panel
- Unvarying distance between two nested tables, even with modesty panel
- It is possible to sit at the head of the table
- Lockable castors

Safety

- Automatic, synchronised locking mechanism for table top when in a horizontal position
- It is not possible to operate or release the mechanism when weight is on the table top
- The mechanism is neither self-actuating nor can it be released accidentally
- No visible locking hooks or pinch points
- Passed stability testing
- GS mark for tested product safety

Power and data

- Multimedia lids Coni Cover, A01, A02, B01 and B02 with inserts, positioned in the middle, concealed cabling
- With centrally positioned power and data module and/or modesty panel, folding and nesting
- Power and data box featuring a strip with 4 inserts (with 2 up to 4 inserts customisable with individual and country-specific plugs and sockets)
- Power and data boxes are exchangeable and can be assembled without the use of tools
- Netboxes Turn, Turn Comfort, Axial, Axial Comfort (fitted with up to 4 country-specific inserts) and Netbox Coni (fitted with up to 3 country-specific inserts) can be positionned outside of the centre
- Power and data modules are tested acc. to DIN VDE Directive 0701-0702 June 2008
- Closing lids for multimedia lids A01, A02, B01 and B02, HPL unidecor, Fenix NTM or real wood veneer
- Vertical cable duct attached to a column
- Cable routing inside column
- Horizontal cable routing without additional accessories
- Tables featuring a cable duct can be nested, unvarying distance between nested tables
- Plenty of legroom, even with cable duct installed

Accessories

6000 san_siro table configurations

Apart from the stand-alone tables, table series 6000 san_siro is available in a multitude of standard-issue table configurations for up to 24 persons. On top of this, individual table configurations with custom table top shapes for a number of persons of your choice are built to order. For more information, we refer to our datasheet “Table Configurations”. Please contact us to receive your copy.

Fire Prevention, quality, sustainability

Excerpt

Fire Prevention

Depending on the environment, contract seating has to be able to fulfil very specific requirements. Interior designers and planners sometimes have to clear difficult hurdles: such as exacting fire prevention regulations. Kusch+Co has worked out individual solutions:

Wooden parts
As standard, high-grade wooden veneer finishes and high-grade wooden lippings are protected by a UV curing, environmentally harmless, water-based lacquer meeting all the requirements of “low flammability” acc. to DIN EN 13501 B s2 d0.

Table tops
Table tops with a 3-layered chipboard core, and featuring either a HPL or real wood veneer surface are also available in a low flammability finish.

Please contact us if you wish to receive the test reports.

Please contact us to receive further information.

Quality

Our environmental and quality management systems are certified acc. to DIN EN ISO 14001:2015 and to DIN EN ISO 9001:2015. External audits as well as our in-house laboratory safeguard our quality level.

The tables of series 6000 san_siro meet the requirements with regard to stability, static and dynamic load as well as strength and durability in compliance with the current European Directives, standards and regulations.

On top of this, we voluntarily test the strength of our table frames with an additional horizontal load test using higher weights and more test cycles.

All the power and data modules feature safety-tested components bearing the VDE mark. All tables with power and data modules meet the requirements of the European Directives, standards and regulations currently in effect. The components are all fitted, tested, labelled, and documented by skilled and trained personnel.

We are certified in compliance with DIN EN ISO 9001:2015. In our own laboratory, we test our products before their market launch whether they comply with the normative requirements applicable to contract seating, task chairs, and tables, and issue a Declaration of Conformity.

We happily make these Declarations of Conformity as well as our brochure “Mission Statement Quality” providing detailed information on our test procedures available to you – please contact us.

Sustainability

Kusch+Co products stand for long life cycles and optimum recyclability. From the first design drafts of a new product, we take all environmental-relevant components and production processes into consideration, ranging from the materials selection and the design all the way to the manufacturing processes which also contribute towards our sustainable energy balance.

Environmental Product Declarations are available for all series, in accordance with DIN EN ISO 14021 Type II, providing more information about all environmentally relevant aspects, including the Credit Points for the LEED certification of a building. Please contact us for more information.
