

DEEP LOUNGE DesignArchirivolto

Quinti®

Padding sofas system of the Deep collection

Versions

Armchair
2 seater sofa

Internal Structure and Tires

The internal structure of the Deep Lounge system is entirely made of Plastitex, patented fireproof eco-friendly material which its weight is lower than 70% compared to the traditional stems.

It is upholstered with polyurethane rubber, variable density and resinated in order to confer great comfort to the sofa and the armchair.

The coating can be made in all colors and coatings and can be chosen on the Quinti Colours System Swatch card.

Legs finishes

There are three types of structures characterizing the armchair:

1. 4 spoke white painted or polished aluminium
Base on feet
2. 4 metal white painted legs Base
3. 4 wooden natural or tempered oak legs

There are two types of structures supporting the sofa:

1. 4 metal white painted legs
2. 4 natural or tempered oak legs

USAGE AND CARE

For a proper maintenance of the products and to maintain unchanged the characteristics of the materials, we recommend to follow some very simple care instructions.

FABRICS

Cleaning: check the dedicated selection written on the color Swatch card. Usage: it is recommended to pay attention to the fabrics as they can be easily cut or ripped.

LEATHERS

Cleaning: clean with a wet white cloth with water. We recommend to use high quality products for the cleaning of the leather and to follow carefully the instructions of the manufacturer. In doubt, try out the product on a hidden part and wait at least 24 hours for the occurrence of any problems. Usage: remember that the leather is a delicate material therefore it is recommended to pay particular attention while using.

WOODS

Cleaning: clean with a soft and wet cloth with warm water. We always recommend to dry immediately after the cleaning process. All liquids or other residue must be removed in order to avoid the absorption. Usage: wooden surfaces, being a natural material, could be affected by an alteration of the color shade during time and use. We also remind that wooden surfaces cannot bear with high temperatures if placed directly on the wooden top.

METALS

Cleaning: both steel or aluminium surfaces, and painted ones, must be cleaned with a soft and wet cloth with hot water. For the most persistent stains, a small amount of liquid soap diluted in water may be used. We always recommend to dry immediately with a soft cloth or a leather one after the cleaning process. Never using cleaning products for steel, chlorine, bleach or other strong detergents. It is not recommended to use abrasive creams, score pads and abrasive sponges that can scratch the metal surfaces. Usage: pay attention to the stains of food such as coffee, coke, fruit juices that can leave indelible marks on the surface.

WARRANTY

QUINTI guarantees the products will maintain their properties for 6 years from delivery, except normal usury and provided that they will be used according to the guidelines given. QUINTI will replace, free of charge, any product found non-compliant with this warranty, without incurring any other liability of sort. Components, external accessories or materials supplied by the buyer and applied to the products in order to customize them will not be supported by the guarantee. For an optimal maintenance of the products and to keep unchanged the characteristics of the materials with which they are made, some simple attentions are necessary.
