It is not possible to change delivery day when goods has been dispatched without extra charge. Telephone notification is not an on-time and on-site demand, only information about estimated delivery time. If deliveries will be denied a second delivery will be charged on separate Invoice.

TRANSPORT ON-TIME AND ON-SITE DEMAND
On-site and on-time unloading requests will be charged at prime cost.

DAMAGES AND CLAIMS

Transport damage:
Upon receipt of the goods, the recipient must check that the consignment is correct with respect to the number of packages and condition of the goods. If a package is damaged or missing, this must be immediately noted on the consignment note to the driver as well as immediately in writing be notified to Abstracta.
Hidden damages that have not been apparent upon receipt, or damages that could not reasonably have been noted due to e.g. large volumes of goods, shall promptly be notified in writing to Abstracta within six calendar days. Any damage should be photo documented to facilitate the assessment of claims for compensation. Damaged goods must not be moved to another location.

Other customer complaints:
Complaints are handled before detailed report including photos have been submitted to our Claims Support. Abstracta may require return of the product to conduct a proper investigation. Abstracta shall after approved claims either repair or replace defective products.

ORDER CONFIRMATION

The order confirmation is the basis for the order and is expected to be reviewed by the buyer within 48 hours. After 48 hours, the order is considered recognition of customer approval unless otherwise notified. We reserve the right to charge a fee for changes or in the event of cancellation made after approved order confirmation.

RETURNS

Returns cannot be done without first contacting our Sales Support for acquiring a return form. Return of stock items are allowed within 14 days after delivery date. The goods must be sent in original packaging. The customer stands for return shipping. Any shipping damages occurred will be charged to the customer. Abstracta charge the customer 30% of the value of the goods in return deductions. Minimum return costs are €40.

CANCELLATION OF ORDERS

Cancellation of stock items may take place no later than 3 working days after the order confirmation date. In case of cancellation of the manufacturing goods, the cost of the work will be charged.

WARRANTY

5 year warranty, counted from the date of delivery, provided the goods immediately upon delivery have been placed indoor with normal temperature and has not been subjected to unusual wear or damage. The warranty applies to material-, production- or construction-failures.
Normal wear and deterioration of damage to lacquered details are not covered by our factory warranty.
Abstracta even leave 10 years spare parts warranty from date of delivery. Delivery dates shall be evidenced by the customer.

ENVIRONMENT AND QUALITY

Abstracta is certified according to the environmental management system ISO 14001, to the quality management system ISO 9001 and ISO 45001 Occupational Health and Safety Management.

ECO LABELLING

Parts of the collection is eco labelled with the Möbelfakta.
Certified products are marked with the logo Möbelfakta on our webpage.

Price list for 2022, EXPORT FREE.
We reserve the right for any typographical errors.

Abstracta Fast Supply, 5 days dispatch!

The following products can be delivered from the factory within 5 working days once the order is marked **Fast Supply**.

- If an order contains both Fast Supply products and standard delivery time products, the despatch time is controlled by the standard delivery time products.

Soundscapes created with care for humans and our planet

At Abstracta, we have been working to create better soundscapes since 1972 – which makes us acoustics pioneers. The core of our business is well-being, which for us includes the well-being of future generations and of the planet. As we see it, sustainability is a natural part of our work. Every day, we work hard to reach our five sustainability goals. With us on our journey is a team of skilled suppliers and creative designers that take the issue of sustainability and soundscapes just as seriously as we do.

Abstracta 2030 – our five sustainability goals

– Carbon-neutral (Scope 1 & 2 reached in 2021)
– Recycling of 100 % of our textile waste
– 100% FSC-certified wood
– 100% Möbelfakta certified products
– Circular range of products

This is what we do today to reduce our carbon footprint:

– Abstracta's factory in Lammhult runs on 100 % renewable energy.
– Textile waste and recycled plastic bottles are used as acoustic filling in our products.
– We only buy company vehicles that are all electric or hybrid.
– We prioritize local suppliers, which decrease our emissions from transport.
– We prioritize transport partners with Euro 6 vehicles.

Zero-waste with Abstracta's recycling service

Since year 2020, we have introduced a recycling service for our clients. We've simply started to collect worn-out acoustic panels and other products for renovation, reuse or recycling. To facilitate circularity, all our products are module-based. Thus, they are easy to repair, easy to reuse, and easy to recycle. This way, we contribute to a sustainable future.

The global goals & certifications

The UN Sustainable Development Goals are the basis of our environmental work. We focus on the five goals to which we can contribute most. We are proud to be certified according to the following standards: ISO 9001, ISO 14001, ISO 45001, Möbelfakta and Acoustic facts.

Read more about our sustainability work:

CARE INSTRUCTIONS

FABRIC

To maintain the color and appearance of the fabric, the fabric should be vacuum cleaned regularly with a soft nozzle.

Stain Removal for Polyester:
- Use non-colored towel or a washcloth to suck up as much as possible of the stain. Dried stains should be vacuumed.

- Wet the stain sparingly with a white pure cotton cloth, warm water and possibly a little pH neutral cleaner.
- Press a dry cloth or colorless paper towel against the fabric so that moisture and dirt being sucked up.
- Repeat wetting and suction until the stain is gone.
- Use clean water without detergent at the final cleaning.
- Finish with suction.

Stain Removal for wool:
Dab or wipe gently with a damp cloth.

CORK

Our cork surfaces are kept clean and in good condition by vacuuming them regularly with a soft brush nozzle.

Stain removal:
Carefully wipe up any stains using a damp cloth. Then dry the surface.

Disinfection of Sahara acoustic panel:
The Sahara acoustic panel is made completely from cork and is now approved to be cleaned using disinfectants, enabling it to be used in rooms where fabric covered acoustic panels are not suitable.
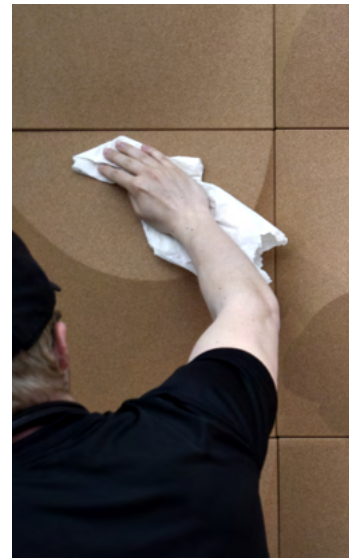

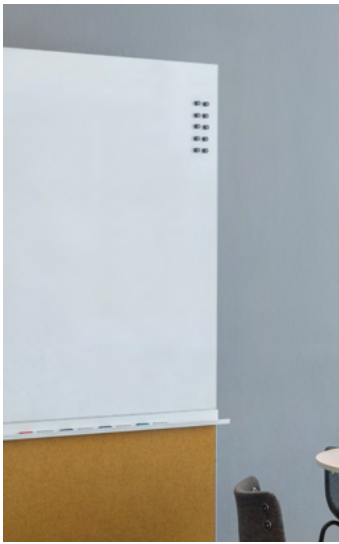

WHITEBOARDS OCH GLASSBOARDS

Remove any protective film from the writing board and thoroughly clean the surface before first use. Moderately-used writing boards should then be cleaned a couple of times a week. The board must be absolutely dry when used. Use only pens intended for whiteboards. Replace the felt on the eraser on a regular basis.

Clean as follows:

- Wipe with approved cleaning fluid intended for whiteboards.
- Then wash away residual cleaning solution with clean lukewarm water.
- Wipe dry with a cloth.
- Repeat if necessary.
- Easier soiled paintings can be cleaned with only lukewarm water.
- Wipe dry with a cloth.

Note:

Avoid detergents that are not intended for whiteboards (e.g. soap or detergent) when they can leave residues which hinder erasure.

TABLE TOP SURFACE (dB Forbo linoleum surface)

Regular maintenance:

Wipe daily with a damp cloth and PH neutral detergent, or a mixture of water / soap or water / wax.

Stain removal:

To protect the table surface; always use underlays under cups, flower pots etc.

Remote spots as fast as possible! The surface should be cleaned with PH neutral detergent and water. In case of pigmented stains, they can be remo-ved with turpentine or other oil-based solvent.

Note:
Do not use alkaline or alcohol-based cleaners!

Acoustics

The soundscape is not visible,
but it affects us more than we think.

Three symbols to make it easier to understand how
our acoustic products affect the audio environment:
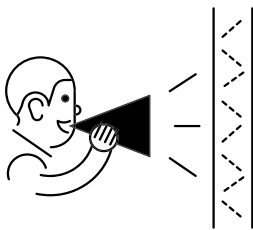

Absorption

Absorption means that the sound that
hits a surface gets absorbed and
transformed into heat.
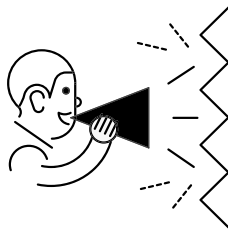

Diffusion

Diffusion means that a sound
hitting a surface "shatters", which
helps one avoid unpleasant sound
reflections , in other words echoes.
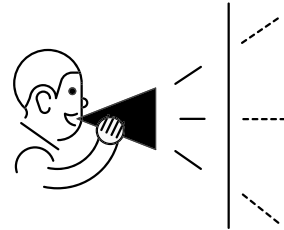

Attenuation

Attenuation means that an object
shields off and lessens the sound level
from one side of the object
to the other.

AGILE

Design Studio Stockholm. Agile, the new mobile media screen, makes it easy for a team to quickly and spontaneously get together for a meeting! In many workplaces, there is a growing need for a product that combines technology/ monitors with writingboard. Agile acts as a seamless project room on wheels that features all the tools you need: screen, foldable laptop desk, concealed cable for connecting to the screen and mains power. The screen itself is sound absorbing, and features a writing board on the rear.

AGILE MOBILE MEDIA SCREEN

Metal frame, painted in one of 3 available colours. The legs feature lockable wheels. The top section of one side can accommodate a TV screen of up to 55". To buy the product and a TV screen together, add "NEC video conferencing solution" to your order as an accessory. If you want to use your own TV instead, it should be no more than 1240 mm (55") wide. The lower part of the screen is upholstered and has a sound absorbing filling, as well as space to conceal electronics. The other side of the screen features a full length magnetic whiteboard.

There is a foldable laptop desk on one side of the frame, which features an integrated cable (USB-C) for screen sharing and laptop charging. Power can be connected from ceiling, floor, right, left hand sides.

Fabrics: 175 000 20: "Repetto" 1301, 175 000 30: "Repetto" 1801 and 175 000 40: "Vidar 4" 1511.

AIR SERIES SUSPENSION RAILS

Each suspension rail includes accessories that enable suspension from both ceiling and on walls. The following components are included with Air suspension rails: Aluminium rail, wire with adjustable wire lock, end closure, coupling fittings between rails, wall bracket, coupling fittings to Air product, suspended ceiling mounting for 25 mm T-profile, and a ceiling mounting. Before purchasing a Radius Bent rail, ask Sales Support which pattern configurations are technically compatible with that type of rail.

ALUMI

Design Nina Jobs. Alumi is a sober and flexible series of sound-absorbing screens. Alumi is available is several colours and discreet patterns. The screens are framed in an elegant aluminium rail. The inside consists of a material that reduces the sound level and brings an increased level of comfort to the acoustic environment. A sound absorbing sheet of felt/fabric is applied to both sides. Choose between a smooth felt surface or three different felt patterns. Felt patterns are also available with Focus Melange fabrics. The screens are installed without tools.
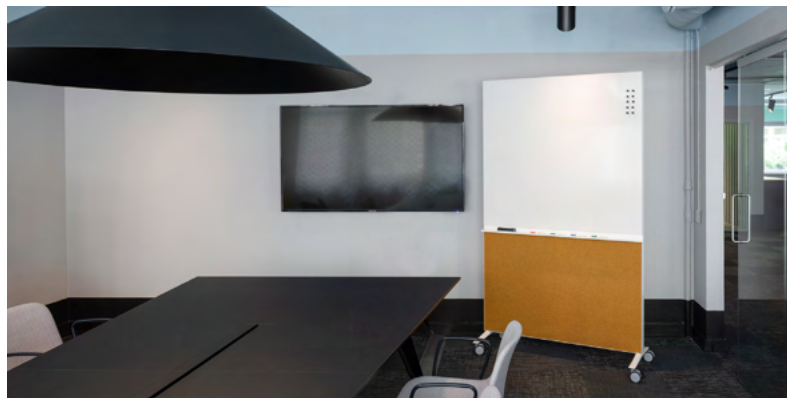

ALUMI FLOOR SCREEN

Screen with an aluminium frame in white or anodised version. The screen is filled with a sound absorbing material. Upholstered with felt or fabric on both sides. Legs to be purchased separately.

BASIC BAFFEL

Use baffles to effectively dampen sound in rooms with high ceilings! The sound absorbing raw core is made out of polyester derived from recycled PET. Basic Baffles are available homogeneously in raw material, known as "Soundfelt". Soundfelt can also be covered with fabric where the Soundfelt core can be seen at the edges. A wire kit for ceiling mounting is included.

A sound absorbing ceiling baffle in two different widths. Wires included.

CHUBBY

With its 88 mm thickness, Chubby works as a very effective sound barrier in environments such as open plan offices. The screen is available with or without a glass upper section and in a variety of widths. The frame is made of anodised aluminium. Chubby can also be equipped with an integrated cable duct for completely concealed cable routing. Adjustable support feet are available as an option and must be purchased separately.

dB

Design Thomas Bernstrand. The ambition with dB is to give more space to the individual and to create opportunities for people to express themselves in their surroundings. The screens can be upholstered in any fabric. Instead of legs, screens have a cast base, which allows them to be angled as desired when combined with each other. The cast base also conceals cable routing. The series includes a writing board, a cork notice board and additional accessories that allow space for photos, magazines, plants and other personal items. Enclosure combinations are available with and without integrated desktop. The integrated desktop is height adjustable. Desktop in laminate or Abstracta's own Strata top with linoleum surface. The disc is sound-absorbing. For enclosures with an integrated desktop, four hidden electrical outlets are included. For enclosures with a front screen wider than 1200 mm, fabric that is compatible with wide floor screens must be used;

DB FLOOR SCREEN

Floor screen that can be used freestanding or connected to other dB screens (connectors purchased separately). The way in which the cast base is designed means that the screens can be angled in any position when combined with each other. The cast base also conceals cable routing. Black cast base. Wheels available separately as accessories.

DB S-ENCLOSURE WITH INTEGRATED DESK

Complete S-format enclosure with integrated desk for two workplaces. The desk is height adjustable. Desktop made from laminate or Abstracta's in-house developed Strata sound absorbing board with a linoleum surface. Four concealed electric outlets per workplace. For enclosures with a front screen wider than 1200 mm, fabric must be used that is compatible with wide floor screens, see p. 10. Add dB accessories. Wall height, incl. legs, is 1565 mm.

dB MODULSOFFA

Design Thomas Bernstrand. The vision with dB is to create a screen system that acts as subtle scenography for open office environments, made to be brought to life by the people that work there. The range has now been supplemented with functional modular sofas that can be built in ringed or straight shapes that expand the acoustic area of the space. The modules can be easily added to existing dB pillars, but also well on their own as separate pieces of seating furniture. Create a sense of seclusion using modular sofas to form a sort of box. Add to your dB unit as your room needs change! The product is filled with sound absorbing fabric offcuts sourced from Abstracta's own factory in Lammhult.

DB RECTANGULAR POUFFE

Freestanding, rectangular pouffes that can be assembled to form a variety of seating configurations. The single module is used as an end module and is available both with and without power sockets. Augment your seating area with extender modules, which come with a connector that allows you to connect modules on the short sides and at the corners of the long sides of your arrangement. The only thing limiting how you connect and reconnect units is your imagination!

dB PILLAR

Design Thomas Bernstrand. In architecture, the pillar plays a load-bearing role. With his new product for Abstracta, award-winning designer Thomas Bernstrand explores the potential of the pillar to add value and function to a space. The dB Pillar is filled with sound-absorbing waste fabric from Abstracta's factory in Lammhult. As a result, the product contributes to Abstracta's long-term goal of achieving a circular production process. dB Pillar is characterised by the same level of simplicity and playfulness as the other products in the dB series. dB Pillar is available as a desk, pallet and pillar with various functions and appearances, e.g. newspaper rack with planter on top.

DB PILLAR

This innovative pillar is 1930 mm tall and is available in three models with magazine rack, clothes hooks, or a whiteboard. All models have a flowerpot on top. The 700mm tall pillar is available with a flowerpot or waste paper basket. The 1100mm tall pillar has a flowerpot on top. Fabric must be selected for all pillars (2/3 of pillars with whiteboard are made up of fabric). For information about pens and whiteboard accessories, see the final page of the price list (PDF version - click here).

DB PILLAR DESK

Desk with pillar-shaped foot with associate stools (purchased separately). The desk is available in two heights and include an integrated electric outlet. The desktop comes in black linoleum as standard. Fabrics must be selected for all models. Upon request, the stools may be made using different fabric on the seat and pillar (same fabric used as standard). A black wooden knob sits on top of the stool, acting as a handle. There are also three others on the pillar from which items can be hung, e.g. a bag.

DOMO ACCESSORY LIST

Domo desk screen can be supplemented with a accessory rail in white painted metal. Cannot be retrofitted, must be purchased together with the screen. Select "Toolbar accessories" if you want to hang it on the rail! These are made from white ABS plastic and can be hung at two levels. There is a pen holder, large shelf, and a small shelf. Both shelves have holes for routing cables. It is not recommended that this rail is used with computer monitors.

DOMO WALL BOOTH

Domo sound absorbing wall booth ideal for environments where there is a need to escape for an undisturbed, temporary environment. The booth is available in both left and right-hand variants. Shelf in white painted MDF. Walls and ceilings are made from a fabric-covered wooden frame with sound absorbing filling. Available in a version with lighting recessed in the inner ceiling of the enclosure. Mounted on concealed suspension fittings.

DOMO WALL

Design Stefan Borselius. Domo's elegance is fully evident when several panels are combined together on a wall. A beautiful interplay between light and shade is created when the bevelled edges meet each other.
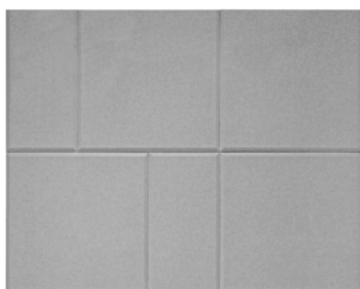

DOMO WALL

Domo Wall is a wall-mounted sound absorber with bevelled edges. Available in rectangular and square-shaped performances and can be fitted horizontally or vertically, which means you can build symmetrical or asymmetrical pattern formations. The wall absorbent is hung using concealed suspension fittings.

HOLLY

Design Runa Klock & Hallgeir Homstvedt. The new Holly acoustic lighting is sculptural, mysterious, and plays with the contrasts between light, reflection, and shadow. The product is good at absorbing low frequency sound. Available in two versions; horizontal and vertical, with or without lighting.

The light globe is made from opal glass - an opaque, white glass that produces a beautiful, even light. The soft, globe-shaped absorbers are made from recycled fabric that has been transformed into Soundfelt REC material and is upholstered in a 3D-stitched melange seamless covering (polyester). The fabric is available in 3 different colours: Anthracite -20, Terracotta -21 och light grey -22.

HOLLY VERTICAL

The vertical acoustic lamp consists of: 4 light globes combined with 6 spherical absorbers. The acoustic lamp has a metal stand that is painted black. Lamps included: E27, 500 Lumen, Kelvin 2700. Luminaire is dimmable. DALI light control is available to purchase separately. Ceiling mounting bracket included. Wire length 6 m. Electric cable length 6 m. Measurements: 540x1015x585 mm.

LILY

Design Runa Klock & Hallgeir Homstvedt. Lily brings a whole new perspective on the acoustic products that are often in the nature of something that is added to an interior to solve noise problems. With Lily, the designers have instead created a lamp where the sound dampening function is integrated without disturbing neither the shape of the object nor the experience of the room. Lily can be ordered with or without DALI control.

LILY 1200

Sound absorbing lamp (diameter 1200 mm), with or without lighting. The LED light fitting is dimmable. For a list of recommended dimmers, see the installation instructions on the website. 230V, 900-1100 Lumens, 2700 Kelvin, diffusion angle 110 degrees. The core is available in white polyester or Hampa, which is made from hemp and starch. Ceiling anchor included. Wires 6 m long. Electrical cable is 6 m long.

MY HIVE

Design Poul Christiansen. Innovative MyHive stylishly integrates desktop and screen into a complete workstation. MyHive is available in either 90 or 120 degree modules in 3 versions; height adjustable table top, fixed table top (three fixed positions), or as a sofa. Concealed cable routing for a cleaner appearance, cables are kept hidden by using a smart zipper function. The body of the screen consists of a wooden frame with sound absorbing filling. Screen thickness: 50 mm. Worktop height above floor 730 mm, (Adjustable worktop: Min. 685 mm Max. 1185 mm).

MY HIVE WORKSTATION 120

120-degree tabletop or sofa integrated with the sound absorbent screens. Cables and the tabletop's height adjustment mechanism are concealed in the screen. Depth: 805 mm.

SAHARA

Design Gabriel Tan. In Sahara, it is the material itself that speaks, or rather whispers. Waste material from cork production is a malleable natural material that is ideally suited for creating sound diffusing shapes on wall panels. The panels are as simple as they are spontaneous, and a perfect starting point for forming patterns of various kinds. The possibilities range from geometrically strict patterns to vibrant and alternating formations such as sand dunes. It was the similarity between the texture of cork and sand that gave the designer the spark of inspiration he was looking for.

SAHARA WALL PANEL

Cork wall panel. Fitted on concealed wall fittings. Wall fittings included.

Description, WxHxD	Kg	Art no	Price A	Price B	Price C	Price D	Price E
Sahara 4-pack 450x450x60 Natural cork	5.2	187 700 00	615				
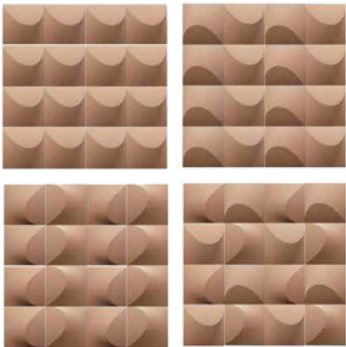

SCALA

Design Anya Sebton. Scala is a perfect yet simple interplay between material and form, making the product ideal for use on large surfaces. Its form is inspired by corrugated sheet metal, being based on sinus curves that create natural air gaps behind the product that, in turn, deliver a product with better absorption characteristics. The sinus curve gives the product a larger absorbing surface that if it had been completely flat. The modules are moulded panels that contain a sound-absorbing, fire-class core that can be upholstered with fabric. The product is partly made from recycled PET. Fabrics from price groups A and B are available in both a 3-pack and a 10-pack. Other fabrics are only available in a 10-pack. Floor screens, table screens, and suspended panels have fabric on both sides.
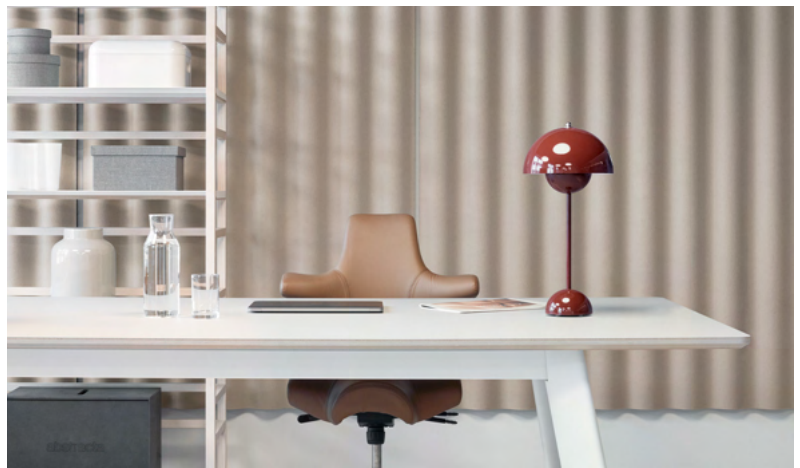

SCALA FLOOR SCREEN

The screens are upholstered on both sides of a die-cast, sound absorbing core, made from recycled waste fabric. A steel tube stand holds the screen in place and emphasises the spontaneous design. The stand is available in black lacquer. Height quoted includes foot.

SCALA XL

Design Anya Sebton. "The inspiration for the design comes from Icelandic houses, where not only the roofs but also the façades are covered by corrugated sheet metal. That got me thinking of how to introduce that feature, that feeling, into an interior space," says Sebton. Scala, Abstracta's hugely popular absorber range, has evolved, including its XL version, into an upscale variant of the original model, giving an interesting impression. Scala XL is perfect for vertical mounting on a wall. Available in convex and concave forms, 2300 mm or 1600 mm tall. The core of the sound absorber is made partially from recycled polyester recovered from PET bottles. Soundfelt VF material is compliant with fire resistance requirement B-S1,d0 in accordance with EN13501. The surface of the sound absorber is customisable, available in a wide variety of fabrics and colours.

SCALA XL CONVEX

Scala XL is perfect for vertical mounting on a wall. These convex modules are installed discreetly on a wall using invisible metal fittings in the rear of the panel (included). Available in heights of 2300 mm and 1600 mm.

Description, WxHxD	Kg	Art no	Price A	Price B	Price C	Price D	Price E

SCALA XL CONCAVE

Scala XL is perfect for vertical mounting on a wall. These concave modules are installed discreetly on a wall using invisible metal fittings in the rear of the panel (included). NB When several modules are placed next to each other, it is important that each end of the pattern is completed by a "Right" (on the right hand end) and a "Left" (on the left hand end) module in order to produce a beautiful completion of the waveform. Between these, only fit "Centre" modules. The "Single" version is to be used when installing individual modules, i.e. where there is no adjacent panel. Available in heights of 2300 mm and 1600 mm.

SKY

Design Stefan Borselius. Thanks to its sculptural form, Sky delivers a radical improvement to the acoustic landscape. The shape's starting point is the sphere, which Stefan Borselius has reduced to an hourglass-like shape that forms beautiful wave patterns when the modules are combined with each other. Sky is available for both walls and ceilings.

SKY CEILING

Sky Ceiling is easily fitted on the existing inner ceiling using magnets. Sky Ceiling consists of an in-house developed acoustic core that, when combined with Camira Xtreme CS fabric, is compliant wit fire requirement B-s1, d0 in accordance with EN13501. Purchased by the module, magnets for fitting to existing inner ceiling are included. NB If your suspended ceiling does not have a magnetic supporting structure - purchase bracket item no. 190 901 00.

SOFTLINE

Softline is a classic screen system that effectively absorbs sound and creates a more pleasant acoustic environment. The screen is built on a solid wooden frame with sound-absorbing filling. Softline's extensive range leaves no screening or acoustic problem unsolved. However, if this does not suffice, the product can be adapted as necessary. No tools are required to set up the screens. The screens can be equipped with shelves and other accessories. Legs increase screen height by 50 mm. The screens can be made in other sizes upon request!

30

SOFTLINE 30 FLOOR SCREEN ASSEMBLY INCL. LEGS

Complete screen set for fast delivery! Black legs included raise the height of the enclosure by 50 mm. Choose between Dox & Salsa fabric (Price group A) and Focus Melange fabric in 6 standard colours (Price group C). In order to create an enclosure around a desk, there are complete enclosure configurations in Soneo and dB series.

SONEO WALL

Soneo Wall, with its discreet smooth shape, can cover a large wall area and, thus, melt into the background. Exciting formations are created thanks to the colour of the absorbers and placement in relation to each other. Each module consists of a sound-absorbing filling in a fabric covered wooden frame. Soneo Wall 100 has extra depth for better absorption. Soneo Wall is mounted on concealed fittings.

SONEO WALL ABSORBER

Wall modules that can be combined to form various patterns. Soneo Wall 100 is extra deep for improved absorption. Mounted on concealed fittings. Soneo Wall is made in accordance with technical, environmental and production ethical requirements. Wall fittings included. For installation of modules turned 45 degrees - fittings for angled installation to be purchased separately.

STITCH

Design Stefan Borselius. Stitch is soft both in terms of the materials as well as its expression, making it an exceptional absorbent. The screen consists of a sound-absorbent filling, fitted inside a solid wooden frame. Around the frame is a separate fabric upholstery. The legs are made from ash and have a soft, friendly idiom, just like the screen. Works just as well at home as in the office.

STITCH FLOOR SCREEN

Legs add 50 mm to the height. Legs purchased separately.

TRILINE WALL

Design Anya Sebton. Triline Wall sound absor-
bing modules have a straight finish, meaning
that the product is perfectly suited to creating
full coverage patterns on large walls. Can be
mounted horizontally or vertically, giving you
the freedom to create both symmetrical and
asymmetrical pattern configurations. Moun-
ted easily using hidden suspension rails. The
absorbers consist of a sound absorbent filling
mounted in an MDF frame, upholstered with
fabric.
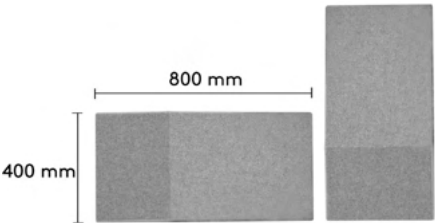

TRILINE WALL

Sound absorbing wall absorbers. Purchased per module and mounted on concealed wall
fittings (included).

TRUMPET

Design Stone Designs. Trumpet acts as a reversed trumpet - instead of producing sound, it absorbs sound. "It isn't a sound absorber with LED lighting. It's a lamp with acoustic characteristics," says Cutu Mazuelos, who designed Trumpet for Abstracta together with fellow designer Eva Prego. This distinction is decisive for the two designers, whose aim is to not only reduce the sound level in spaces but also to contribute a visual element that enriches peoples' everyday lives. Trumpet has a solid wood body and an acoustic core made from recycled waste fabric and worn-out PET bottles. Upholstered in a wide range of fabrics. The height of the panel can be easily adjusted. DALI light control is available to purchase separately.

TRUMPET LAMP/BAFFLE

Suspended absorber with or without LED lighting (dimmable). Available in uplight and downlight versions, as well as a version that features both! A 3-metre wire with a ceiling anchor and 6 metres of electrical cable are included. 230V input. Size W1000 = 1760 Lumen output, size W2000 = 3520 Lumen output. 3000 Kelvin, 30W. DALI lighting control is available and can be purchased separately.

PLENTY POD

When you need an undisturbed room for an individual meeting, work or an important phone call, PlentyPod is the solution. Plenty Pod is a series of silent rooms that have become an obvious component in today's activity-based workplace solutions. Plenty Pod is available in three different sizes, which we call Small, Medium and Large. The table top is supplied as standard in Plenty Pod small, and additional power sockets and network connections are available as options in all models, which means that you can connect a laptop for video or web conferencing. Ventilation, LED lighting and electrical sockets come as standard. Soundproofing Rw 36, regardless of module size, with or without floor. Shipping included.Supplement your Plenty Pod with an NEC video conferencing solution (see accessories).

PLENTY POD FIXED MODULE, SMALL

Module WITHOUT acoustic floor. Choose between natural/white anodised or painted in any RAL Classic colour on the frame. If you choose a RAL-painted frame, buy a fabric coated outer panel. Inner walls are upholstered in Focus Melange. Other coatings available by separate quote. 2x230V electrical outlets included. Plenty Pod Small includes a desk as standard, which is positioned at a height of 1010 mm (from floor to top edge of the desk top). NB Installation not included in the price, quoted separately.

Description, WxHxD	Kg	Art no	Price A	Price B	Price C	Price D	Price E

ZEN POD

Design Staffan Holm. The new Japan-inspired series Zen Pod makes it easy to create oases of tranquillity in the workplace. Zen Pod consists of small, mobile, quiet rooms that are impeccably designed. Available in three sizes; Small, Medium and Large. All feature an inner floor, stand foot, and wheels. Painted aluminium frame. Two of the walls are made from sound absorbing acoustic glass. The two other walls are sound absorbing and upholstered with fabric on both sides. The sound absorbing ceiling features comfortable shallow angle lighting along the entire inner edge. Ventilation, shallow angle lighting, and power sockets (230V) and controls are included. Shipping included. Sound insulation: Class A in accordance with ISO 23351. Choose between 2 different equipment packs and 3 different furnishing packs. See matrix.
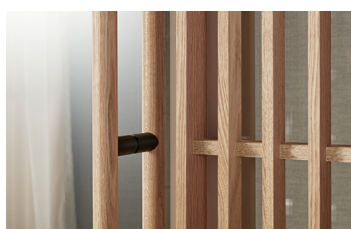

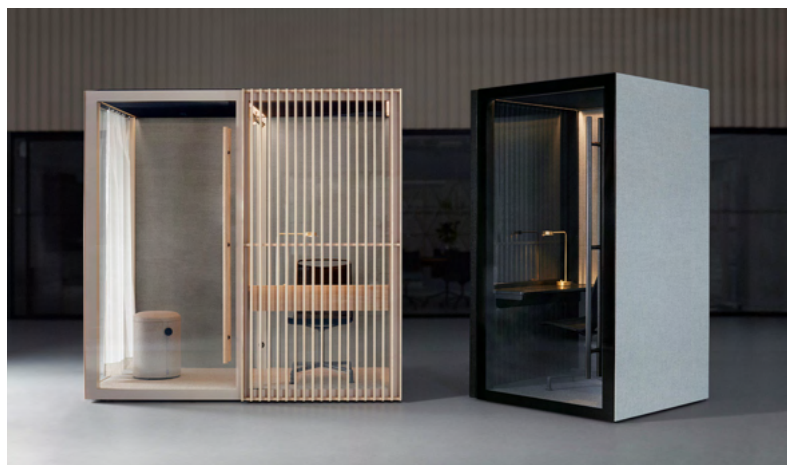

ZEN POD, SMALL

A mobile, quiet room for 1 person. Take a phone call or work for a while in a focused manner! Desk with one glass wall, supplied as standard in Small. Choose your equipment and furnishing pack, see description in matrix. Measurements: 1200x1200x2310 mm.

DRAFT

Design Daniel Lavonius Jarefeldt & Josef Zetterman. Fixed workspaces and meeting rooms are no longer a given. Instead, spaces are defined by how they are used at any particular time In order to satisfy these demands for adaptability, the designers have developed Draft - a double-sided, mobile writing board with a graphic design that is as elegant as it is simple.

DRAFT MOBILE WRITING BOARD

Writing board with e3 enamel whiteboard surface on both sides, or one side with a whiteboard and a cork surface on the other. The writing board is mobile, double-sided and has an anthracite grey steel frame on castors. The castors are lockable. Under the writing board is an oak box - choose either natural oak or anthracite grey stain - for storage of things such as pens or board erasers.

Description, WxHxD	Kg	Art no	Price A	Price B	Price C	Price D	Price E

MOOW

Design Stefan Borselius. The soft design language of Moow adds an exciting new expression of a functional rail system. Moow consists of wall-mounted whiteboards in e3 enamel suspended on either wheels and a wall rail, or fixed directly to a wall. The whiteboard can also be used alone standing on its wheels against a wall when not suspended on the wall rail. The wall rail system comes in a length of 4 m as standard, but can easily be cut using a saw. If you require the rail to be cut in the factory, this can be done for an additional cost. Flip chart block holders are available as optional accessories. For details about pens and accessories, see the last page of the price list (PDF version - click here).

SKETCHALOT

Sketchalot is a modular whiteboard that doesn't require any fixing on to the wall. The design allows whiteboards to be placed close together and directly against the wall, which means they do not take up much space. Sketchalot has an E3 enamel writing surface and rests on two detachable, easy to fit feet in white painted aluminium. The reverse is white. For details about pens and accessories, see the last page of the price list (PDF version - click here).
