# 3500 YARA

# DESIGN BY JORGE PENSI

A functional chair of elegant proportions made of the natural, renewable material wood. Characterised by a unique and vibrant design language. The sweeping arms mimic the inviting gesture to take a seat. Yara is a high-quality series of extraordinary versatility, designed for a long life cycle.

Jorge Pensi studied architecture in his home town of Buenos Aires. Since 1977, he lives in Barcelona and made a name for himself with his aluminium furniture designs. He used to be a visiting lecturer at the Art College in Stuttgart. His designs can be admired at many international exhibitions. The long list of design prizes underlines the importance of his works as a designer. Jorge Pensi's trademark style is reflected in his series for Kusch+Co.

# VARIATIONS

# 3520/3550 STACKING SIDE CHAIR

The entirely upholstered seat shell, available with a back in two different heights, appears to be floating on the slender stacking wooden frame. The upholstery comes in two variations: either slender and comfortable or more luxurious, and therefore extraordinarily cozy and snug.

# 3520/3550 STACKING ARMCHAIR

The armrests, which arch outwards, welcome everyone with open arms. Thanks to the ingenious design, both arms and frame look exceptionally slender. The stacking armchair comes with either a normal or high back, and with two upholstery variations.

# PRODUCT DATA

## 3520/3550 STACKING SIDE CHAIR

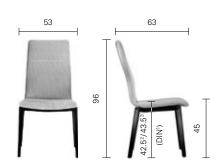

### ACCESSORIES

- Plastic glides
- · Felt glides
- · Metal glides
- · Protect glides

Weight: 6.5 – 7.0 kg depending on model

Weight: 7.0 – 7.5 kg depending on model

## STACKABILITY

- Stackable on dolly 1011/8: 5 units
- Stackable on dolly 3980/8: 5 units
- Stackable on dolly 3880/8: 5 units

# STACKING ENTIRELY UPHOLSTERED

- Stack of 4 units recommended
- Height plus 9 cm per stacking side chair
- · Depth plus 6 cm per stacking side chair

## STACKING ENTIRELY THICK UPHOLSTERED

- · Stack of 4 units recommended
- Height plus 11 cm per stacking side chair
- Depth plus 8 cm per stacking side chair

Dimensions in cm

<sup>&</sup>lt;sup>1</sup> The DIN seat height was determined acc. to DIN EN 1335-1, i.e. the seat height measured by means of a measuring device at the position of the ischial tuberosity (sitting bones) after having placed a load of 50 kg on the half width of the

seat. <sup>2</sup> entirely upholstered

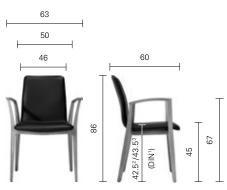

<sup>&</sup>lt;sup>3</sup> entirely thick upholstered <sup>4</sup> high back

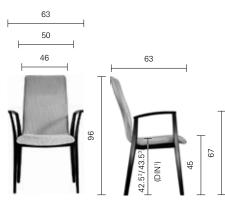

# 3520/3550 STACKING ARMCHAIR

## ACCESSORIES

- Plastic glides
- Felt glides
- · Metal glides
- Protect glides

Weight: 7.5 - 8.0 kg depending on model

Weight: 8.0 – 8.5 kg depending on model

- Stackable on dolly 3980/8: 5 units
- Stackable on dolly 3880/8: 5 units

# STACKING ENTIRELY UPHOLSTERED

- Stack of 4 units recommended
- Height plus 9 cm per stacking armchair
- Depth plus 6 cm per stacking armchair

# STACKING ENTIRELY THICK UPHOLSTERED

- Stack of 4 units recommended
- Height plus 11 cm per stacking armchair
- Depth plus 8 cm per stacking armchair

# MATERIALS, FINISHES

# STACKING SIDE CHAIR / STACKING ARMCHAIR

## FRAME, ARMS

• Natural beech or stained acc. to standard collection

## SEAT SHELL

- Either entirely upholstered or entirely thick upholstered seat shell dependent on model, fabric from standard collection
- Optionally available with upholstery with flame retardant foam resp. flame retardant foam and fireproof fabric

# SOLUTIONS

EXCERPT

Depending on the environment, contract seating has to be able to fulfil very specific requirements. Interior designers and planners sometimes have to clear difficult hurdles: such as exacting fire prevention or hygiene regulations. Kusch+Co has worked out individual solutions:

## FIRE PREVENTION

### WOODEN PARTS

As standard, wooden parts are protected by a UV curing, environmentally harmless, water-based lacquer meeting all the requirements of "low flammability" acc. to DIN EN 13501 C s2 d0.

## UPHOLSTERY

The upholstery is optionally available with flame retardant foam. In addition, it is available with the Kusch+Co Fire Prevention Concept, consisting of a special fabric "flamline" (approved by the building authorities and conforms to DIN 4102 A2 non-flammable) between the upholstery foam and the fabric.

This concept achieves four life-saving objectives. The seating:

- · is self-extinguishing
- · reduces the smoke development
- · prevents an incipient fire from spreading out
- does not turn into an additional ignition source.

Test reports in compliance with national and international standards document the laboratory fire tests conducted on different series finished with a wide variety of materials.

With regard to the upholstery, e.g. with leather, artificial leather as well as many textile fabrics, or to our unupholstered variations featuring a plywood, laminated or plastic seat shell, most of our series meet the following standards:

Germany: DIN 66084 P-a
France: NF D 60-013
Great Britain: BS 5852 Crib 5
Italy: UNI 9176
Europe: EN 1021 part 1/2

Please contact us if you wish to receive the test reports.

## HYGIENE

### KUSCHMED® HYGIENIC-LINE

Products from kuschmed® Hygienic-Line provide an unfavourable breeding ground for bacteria, germs, and mildew. For this purpose, this range is conceived without open-pored veneers, slits in the backrest, improper upholstery, finger traps, open frames, felt glides, or materials that degrade upon contact with disinfectants.

Only fabrics with specific properties, e.g. hygienically impervious fabrics as well as water- and dirt-repellent finishes, qualify for this product line. Fabrics made of nano-coated fibres as well as disinfectant-compatible fabrics are also used.

The surfaces have to be smooth and pore-free, impervious to liquids and germs, and growth-inhibiting for bacteria. All wooden surfaces are entirely sealed with a special high-density, pore-free and disinfectant-resistant lacquer with antibacterial properties. Metal surfaces are sealed with a chrome finish or with a silver-bearing, antibacterial powder coating. The silver ions within the coating are activated upon contact with bacterial colonies, diffusing at the surface, denaturating the cell walls of the bacteria, and thus inhibiting their growth.

Please contact us to receive further information.

# QUALITY, SUSTAINABILITY

EXCERPT

## QUALITY

Our environmental and quality management systems are certified acc. to DIN EN ISO 14001 and to DIN EN ISO 9001. External audits as well as our in-house laboratory safeguard our quality level.

All variations of series 3500 Yara meet the requirements with regard to stability, static and dynamic load as well as strength and durability in compliance with the current European Directives, standards and regulations.

On top of this, we test most of our contract seating with higher loads and cycles. On request, we conduct individual tests acc. to the customer's specifications.

In our capacity as a DIN EN ISO 9001 certified company, we are authorised to test in our own laboratory whether our products meet the GS requirements for Tested Product Safety and issue a Declaration of Conformity equivalent to a GS sign.

We happily make these Declarations of Conformity as well as our brochure "Mission Statement Quality" providing detailed information on our test procedures available to you – please contact us.

## SUSTAINABILITY

Kusch+Co products stand for long life cycles and optimum recyclability. From the first design drafts of a new product, we take all environmental-relevant components and production processes into consideration, ranging from the materials selection and the design all the way to the manufacturing processes which also contribute towards our sustainable energy balance.

Environmental Product Declarations are available for all series, in accordance with DIN EN ISO 14021 Type II, providing more information about all environmentally relevant aspects, including the Credit Points for the LEED certification of a building. Please contact us for more information.
