Product Specification Sheet

This document contains technical
information about the BuzziDonut

Sound absorbing panel with central hole

A round, sound-insulating panel with a hole in the middle that gives it its tasty name. Tasty by name and tasteful by nature: a sleek round form with a space in the middle for lighting, to be covered with one of the specially designed 3D prints available in all the colours of the BuzziSpace spectrum. The BuzziDonut is a fine piece that does not just light up the room but improves the acoustic qualities of the space as well.
